

CS CLEARING SPLITTERS

PULL, SPLIT, AND BACKFILL WITH ONE ATTACHMENT!

Rockland CS Clearing Splitters are the ideal choice for land clearing and wood yard applications. Both a stump puller and stump splitter, Rockland CS Clearing Splitters do it all. All CS Clearing Splitters feature two ripping teeth for slicing lateral roots and pulling stumps, a backfill plate for filling stump holes, and a powerful hydraulic splitter knife.

Rockland CS Clearing Splitters quickly reduce stumps and other wood debris to proper size for tub grinding or landfill operations. The CS splitting cylinder combined with the power of the excavator's curl cylinder delivers tremendous splitting power in any position.

All CS Clearing Splitters are made entirely from heat-treated, quenched and tempered, high-strength alloy steel. They feature a rugged cylinder and oversized sealed bearings for years of dependable service. You can pay a lot more, but you can't buy a better splitter than a Rockland CS Clearing Splitter. Guaranteed!

INSTALLATION INSTRUCTIONS

Rockland CS Clearing Splitters mount on the stick in place of the standard bucket using standard factory pins. A control valve, and stick plumbing are required to operate the CS hydraulic cylinder. The hydraulic cylinder mounting plate must be welded to the underside of the stick.
