

DZ DOZER COUPLER™

Increase Dozer Productivity
Cut Transportation Costs

EVERY DOZER DESERVES A COUPLER!

The Rockland DZ Dozer Coupler increases dozer productivity and solves transportation problems. Consider how these tools on a DZ coupler will add to your bottom line:

- **Wide Angle Blade** - Get more dozing productivity *and* easily transport your machine. With the Rockland DZ Dozer Coupler, escort vehicles and expensive permits are a thing of the past!
- **Semi U-Blade** - Many dozing applications are ideal for a semi U-blade. Now you can easily change to a semi U-blade when required. What used to take hours, now takes seconds!
- **Land Clearing Rake** - Quickly change from a blade to a land clearing rake and dramatically improve clearing productivity. Doze and make roads one minute, remove stumps and brush the next!
- **Snow Removal** - With a Rockland DZ Dozer Coupler, it's no hassle to change to a snow blower, plow, or snow pusher. Disconnect the blade - and away you go!
- **Bedding Boxes** - Need to move bedding boxes around a pipeline job? A dozer will easily go places that other machines can't. Our simple bracket kits allow you to do virtually anything with your dozer!
- **XL25 Tree Saw™** - The DZ Coupler is ideal for loggers. Now you can doze, cut, bunch, and rake all with one machine. Don't just use your dozer for an hour or two - use it all day!

DOZER COUPLERS MAKE SENSE!

HOW IT WORKS . . .

The Rockland DZ Dozer Coupler mounts in place of your standard dozer blade using standard OEM pins. It doesn't require any hydraulic connections. It is a simple, rugged, mechanical coupler that firmly locks the tool in place by means of two easily removable lock wedges. It's rugged, simple, strong, and foolproof. To increase dozer production, see your dealer today or call Rockland for more information.
