

HEAVY-DUTY CONSTRUCTION FORKS

THE IDEAL FORK FOR UTILITY WORK!

Rockland Heavy-Duty Construction Forks are designed for use in construction and utility applications. These forks can be used to handle pallets, pipe, equipment, and stacks of lumber. Just about anything that needs to be picked up, moved, or carried on a job site can be handled with a Rockland Construction Fork.

Rockland Construction Forks feature easy tine adjustment, tine clips to keep the tines from swinging out when dumped, and common sense backframe widths. Optional tine lengths and backframe heights are available to suit your specific needs.

SPECIFICATIONS

Category	Tine Size	Tine Back Height	Frame Width	Weight (lbs)
5	2" x 6" x 48"	26-1/2"	72"	1250
