

Krypto Klaw™

OUTPERFORMS BUCKET THUMBS!
OUTPERFORMS EXCAVATOR GRAPPLES!

DIGABILITY PLUS LOADABILITY

Krypto Klaw™ handle material like an excavator grapple and efficiently dig when necessary. That's an unbeatable combination for more excavator productivity.

The wide, heavy-duty Krypto Klaw™ clamps deliver more clamping force in all positions than any bucket thumb. The Krypto Klaw™ outperforms bucket thumbs because operators can use 100% of the excavator's reach - an important benefit for demolition and many other jobs where reach and grip is important.

Krypto Klaw™ are easy to install. Excavator grapples and bucket thumbs require struts, stick brackets and welding. Krypto Klaw™ attach just like a bucket, and then simply plug in the hydraulic quick connect fittings to go to work.

WHY YOU WIN WITH A KRYPTO KLAW™

- **MORE PRODUCTIVITY** - Krypto Klaw™ clamps follow the bucket for great gription through 100% of the curl cycle. Time wasted pulling or pushing material to position it for a thumb is eliminated, and with the multi rib open clamp design, operators easily see what they are doing.

Operators prefer Krypto Klaws™ instead of conventional bucket thumbs because of the positive, single valve control. And the dual cylinder rugged clamp provides positive load control for faster and easier loading.

- **OEM Digability** - Krypto Klaw™ brackets are recessed into the bucket to deliver 100% of the OEM curl force whenever the Krypto Klaw™ is used with a coupler.
- **Versatility** - Krypto Klaws™ are easily used on more than one machine. They are ideal for use with couplers or with pin-on machines. They can be easily used on multiple machines because mounting plate and strut bracket hassles are eliminated. This is an important feature for both rental companies or contractors that need the ability to quickly change to a bucket for continuous digging or need to set up a machine for demolition work.
- **Satisfaction** - Krypto Klaws™ grip and work better, faster, and easier than conventional thumbs, plus they dig just like an excavator bucket. Hundreds of excavator operators agree. Get a real grip on excavator productivity with an Krypto Klaw™.

SPECIFICATIONS

Excavator Weight	Bucket Width	Max. Throat Opening	Weight lb.
25,000 - 35,000	36"	68"	2250
	42"	68"	2350
35,000 - 52,000	42"	83"	3300
