

MA GRAPPLES

REACH OUT AND GRAB SOMETHING!

AVAILABLE FOR TRACTOR LOADER BACKHOES AND EXCAVATORS

These rugged, open frame, solid tine grapples really turn backhoes and excavators into efficient material handling machines. The MA Grapple can load pipe, handle timber, grab, place, and load material of almost any kind. It can do small site land clearing, and can really speed up residential or light commercial demolition work. The open frame design provides maximum visibility while the side opening and narrow close provide your operator the ability to handle everything from pipe to boulders. It is almost like equipping your machine with a giant powerful steel hand!

Rockland MA Excavator Grapples are designed with the same open frame design that we use on the proven MA land clearing rakes. They are tough—built entirely out of high-strength, alloy steel. The high-strength steel tube frame, heavy-duty sealed pivot pin, and reinforcement at all critical stress areas add up to years of dependable service. These tough grapples are ideal for everything except severe service applications. If you need to reach and grab something, you owe it to yourself to mount the Rockland MA Grapple on your machine and really get a grip on things.

MOUNTING INFORMATION

All Rockland MA Grapples mount on the excavator's stick in place of the bucket using standard factory pins. The grapple is supplied with a support strut and a strut mounting bracket which must be welded to the bottom of the stick.

WARRANTY

Rockland MA Grapples are guaranteed against failure due to defective design, workmanship, or materials for a period of one year or 2,000 hours.
