

# ROCK BUCKETS

DESIGNED TO PRODUCE - BUILT TO LAST

## SPADE NOSE • STRAIGHT EDGE • ROCK TINE

**HD-V SPADE NOSE**

**HD-S STRAIGHT EDGE**

Rock handling demands a special bucket. Rockland has been building rock buckets for over forty years. Put our years of experience to work for you.

### Special features:

Heavy-duty, heat-treated, hard cutting edges.

Straight end plates for reduced side spillage are standard. Cut-down end plates are optional.

Slope-bottom design minimizes bottom and corner wear.

Attaching bracket foundations that run from the loader brackets all the way to the cutting edge provide maximum bottom strength.

Replaceable skid shoes that keep the bucket bottom off the quarry floor and out of the weld shop.

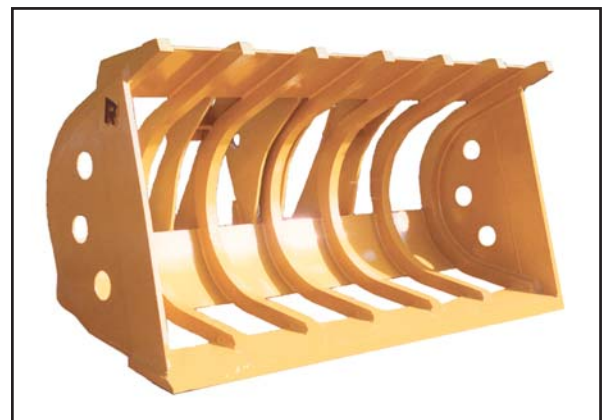

High-strength, weight-saving, quarry-proven alloy steel construction throughout.

It is a fact that wear is related to hardness and harder steel lasts longer. Rockland cutting edges are made of a special quarry-proven, alloy steel that is tougher and harder than typical cutting edges. Some people still build buckets with edges that have a hardness of only 200 to 250 BHN. Rockland cutting edges range in hardness from 390 to 440 BHN. Don't settle for anything less; specify Rockland.

## LOAD WHAT YOU NEED... LEAVE THE REST BEHIND

Rockland RT Rock Tine Buckets get the job done, whether the application is combing out large rocks or loading to a minimum size. The RT bucket is designed to load only what you need.

Rockland RT Rock Tine Buckets are available with virtually any tine spacing required, and can be equipped with any tooth system required. Spec it out your way, for your particular job.

## INSTALLATION INFORMATION

All Rockland Rock Buckets mount in place of the standard bucket using factory pins or specified coupler brackets.

### WARRANTY

Every Rockland HD-V, HD-S, and RT buckets are guaranteed for life against any failure caused by defective workmanship, material, or design as long as it is owned by the original purchaser. This warranty does not apply to any failure deemed by Rockland to be caused by wear, improper maintenance or welding.
