

# Rocklock® Coupler System

## You have an alternative!

### *Built to interchange with major coupler systems*

Rockland's Rocklock® Coupler System will turn your loader into a multi-purpose machine. Rocklock® couplers are designed so that attachments for machines of the same general weight and horsepower are interchangeable. When you use a Rocklock® system, you won't have to trade or modify attachments to use them with your new loader.

**Rocklock® couplers can be designed to work with almost every coupler configuration available.** If you're currently using a non-Rockland coupler system, we can design your new coupler and attachments to work with your existing equipment. This is an excellent option to specify if your customer is already using another system.

**Rocklock® couplers are priced right and delivered quickly.** When you order your Rocklock® Coupler System and attachments, we will guarantee the ship date. We are so committed to delivering our products on time that if it's late, we pay you \$333. It's that simple!

**Rocklock® Coupler Systems, along with all other Rockland products are shipped with Steak Bucks!** Every time you sell a Rockland product you receive Steak Bucks provided by Omaha Steaks.

For more information on the Rocklock® Coupler System or any of Rockland's 130 standard products please call us at 800-458-3773.

## Complete the System

Rockland has many more attachments available for the Rocklock® Coupler System. Please contact Rockland and talk to an Equipment Specialist to find an attachment to suit your application.
