

# TL TILT BUCKETS

## TILT BUCKETS INCREASE EXCAVATOR PRODUCTIVITY

TL Tilt Buckets really increase productivity because they provide up to 45 degrees slope left or right.

When sloping, trenching, grading, or ditch cleaning, control is fast and positive so you get the right slope on the first cut. TL Tilt Buckets are available in a wide variety of widths and sizes to suit any application and they are designed to match the performance capabilities of your excavator.

## BUILT TO LAST IN THE ROCKLAND TRADITION

All TL Tilt Buckets are built of high-strength, weight-saving alloy steel. The bucket tilts on sealed, case-hardened pins and bushings. This all adds up to years of satisfactory, dependable service.

## INSTALLATION INSTRUCTIONS

TL Tilt Buckets use factory bucket pins. They come with two hydraulic cylinders. TL Tilt Buckets require a control valve, stick plumbing, and jumper hoses to the bucket.

### WARRANTY

Rockland Tilt Buckets are guaranteed against failure due to defective design, workmanship or materials for a period of one year or 2,000 hours.
