

TJ TREE JACK

UPROOT TREES WITH YOUR SKID STEER LOADER!

Equipping your skid steer with a Rockland Tree Jack will allow you to pull trees right out of the ground, roots and all! The Tree Jack's patented design harnesses the power of leverage. This design allows your skid steer to generate enough force to pull a tree completely out of the ground. The Rockland Tree Jack can pull trees out of the ground up to 12-1/2" in diameter. It is the perfect tool for land clearing, landscaping, and grubbing applications.

Increase your productivity!

The Rockland Tree Jack is an excellent tool to have when the entire tree and root system need to be removed. In some cases, the rental or purchase of additional machinery can be completely eliminated. The time and cost associated with removing stumps after the trees are felled is a thing of the past!

The Rockland Tree Jack is available for skid steers with 65 HP and above. The Tree Jack is made entirely of high-strength steel and covered by a 1 year, 2,000 hour warranty.

For more information on the Rockland Tree Jack, please call 800-458-3773. Additional photos and videos are available at www.rocklandmfg.com.
